

Join the Bio-based Innovation Student Challenge - Europe 2024!

The Challenge

What is possible when we look to biological and renewable resources to address future challenges and create a sustainable and circular Europe?

The BISC-E Ireland invites students to take part in this year's 'bootcamp' to support the development of innovative "bio-based" products or services within interdisciplinary teams. Connect with peers and industry leaders while developing skills in innovation, measuring impact, and storytelling!

Who Can Take Part?

Students from all disciplines across Irish universities are invited to take part in the challenge. We will assist you in forming interdisciplinary teams to compete in the National Competition.

The winning team will receive €800 and will represent Ireland in the EU competition, with runners up getting €400!

Introduction to the BISC-E Online Session: 19th October 1pm-2pm

Professors and students are invited to join us during Ireland's Bioeconomy Week to:

- learn more about what a bio-based product or service is
- what the 2024 BISC-E will entail and timelines
- meet last year's Irish winners
- Q&A

Follow this QR code to sign up for the Introduction Session or visit the IKC3 website to learn more and to register your interest in taking part in the competition!
